PROFESSIONAL SUMMARY

Senior Software Engineer / SDET with **14+ years of experience** in enterprise-scale web applications, test automation, and quality engineering. Specialized in **end-to-end automation for global eCommerce platforms**, with deep expertise in **Selenium WebDriver, API automation, CI/CD pipelines, and SQL-based validation**. Proven success at **Dell Technologies** delivering scalable automation frameworks, improving release quality, and mentoring teams across geographies. Strong analytical thinker, Certified ScrumMaster, and effective collaborator in Agile environments.

TECHNOLOGY COMPETENCIES

- **Programming & Frameworks:** C#, ASP.NET, WPF, ADO.NET
 - **Databases:** SQL Server, MongoDB
 - **Web Technologies:** HTML, JavaScript, AJAX, JSON
 - **Automation & Testing:** Selenium WebDriver, MTM, Telerik
 - **DevOps & ALM Tools:** Git, TFS, JIRA
-

CORE SKILLS

- **Test Automation:** Selenium WebDriver, Web API Automation, UI Automation, MTM
 - **Programming:** C#, ASP.NET, .NET Core, ADO.NET, Python (basic)
 - **Frameworks & Tools:** VSTS/TFS, CI/CD, SoapUI, WCF Test Client, Telerik
 - **Databases:** MS SQL Server (Queries, Stored Procedures, Functions), MongoDB
 - **Web Technologies:** HTML, JavaScript, AJAX, AngularJS (basic)
 - **Methodologies:** Agile / Scrum, SDLC, STLC, Defect Lifecycle
 - **Operating Systems:** Windows, macOS
-

PROFESSIONAL EXPERIENCE

Perigon Infotech – Dell Technologies (Contract)

Senior Software Engineer / SDET | Apr 2023 – Present | USA - Used **software development objectives** to determine and evolve **appropriate testing frameworks** for Dell.com Global eCommerce platforms. - Performed **end-to-end test automation** of Cart, Checkout, Shipping, and Payment scenarios using

Selenium WebDriver. - Worked on **fixes and enhancements to automation scripts and frameworks** supporting Dell.com Global eCommerce experience. - Analyzed the **entire development lifecycle** and strategized improvements to streamline **design, development, testing, and release processes.** - Participated actively in **defect triage meetings**, collaborating with developers and product teams to resolve issues efficiently. - Analyzed test results, identified software defects, and **logged/tracked defects** with clear reproduction steps and impact analysis. - Built and enhanced **highly reusable, maintainable automation frameworks** using **industry-standard test frameworks.** - Supported **CI/CD pipelines** and continuous delivery testing. - Mentored team members on automation best practices and debugging strategies.

Dell Technologies

Senior Software Engineer | Sep 2021 – Apr 2023 - Automated end-to-end checkout flows across global regions. - Implemented parallel execution strategies to reduce execution time. - Performed root-cause analysis and collaborated with developers on defect fixes. - Recognized with **CSAT and Team Awards** for quality excellence.

UST Global

Associate Software Architect | Apr 2020 – Sep 2021 - Designed automation strategies for enterprise web applications. - Led Web API automation efforts and improved test coverage. - Provided technical guidance and code reviews for junior engineers.

Dell Technologies

Senior Software Engineer | Jun 2015 – Dec 2018 - Built automation frameworks used across **Premier, eSupport, UAT, and E2E teams.** - Developed a **Test Data Management tool** adopted by ~1000 users internally. - Delivered automation solutions for multilingual and multi-region applications. - Awarded **Q1 Silver Award** for innovation and impact.

Capgemini India Pvt. Ltd. (Dell Contract)

Software Programmer | Aug 2012 – Aug 2015 - Automated regression suites for eSupport and Order Status applications. - Implemented database-driven test validations. - Actively involved in defect triage and release sign-offs.

Earlier Experience

- **Future Focus Infotech Pvt Ltd** – Software Programmer (Nov 2012 – Aug 2013)
- **C4U IT Solutions Pvt Ltd** – Software Programmer (Oct 2010 – Nov 2012)

KEY ACHIEVEMENTS

- Architected **enterprise-grade automation frameworks** used across multiple Dell business units.
- Reduced regression execution time through **parallel automation and CI/CD integration.**
- Built **test data management and utility tools** adopted by large QA teams globally.
- Delivered automation for **multi-language, multi-region, and compliance-heavy applications.**

- Led **knowledge-sharing sessions** on Selenium, C#, and automation best practices.
 - Earned multiple **client and internal awards** for quality, innovation, and delivery excellence.
-

CERTIFICATIONS

- **Certified ScrumMaster® (CSM)** – Scrum Alliance (2016, 2018)
-

EDUCATION

- **Master of Computer Applications (MCA)** – Andhra University, Visakhapatnam
 - **Bachelor of Science (B.Sc)** – Andhra University, Visakhapatnam
-

PROJECT HIGHLIGHTS

Global eCommerce – Dell Technologies

- Automated Cart, Shipping, Payment, and Checkout workflows.
- Technologies: C#, Selenium, SQL Server, SoapUI, MongoDB, VSTS.

eSupport – Dell Technologies

- Automation for Order Status, Returns, and Cancellation systems.
 - Focus on API automation, UI automation, and test utilities.
-

Availability: Open to Senior SDET / Automation / Quality Engineering roles
